

## OUR BELIEVE AND AIM

We believe that personal leadership skills development that incorporates social-emotional learning, such as tools and strategies to deal with uncertainties, failures, stress, loneliness, rejections, bullying, etc., should be an integral part of every young person's education.

We aim to challenge the barriers young people face in accessing quality leadership programs that incorporate a higher degree of emotional intelligence, in order to help develop the next generation of leaders for the 21st century.
